Reports from the physician attending Marcellino Cumpo, who is at the City Hospital suffering from a scalp injury received in a fracas on Circle street Saturday, indicate that the man is making good progress toward recovery. There is little danger of complications resulting from the thwack which he received on the head and it is likely that the patient will be able to return home in a few days.

The police are continuing their search for the man alleged to have implicated in the assault on Campo. It is said that the pair, brothers, were seen about town Monday morning.

An interesting study in psychology and the movies is afforded by the presence in the city of "The Birth of a Nation" film and the fact that the crowds which are gathering to see the famous cinema cylinder unrolled are quite as large as the audience last fall, when the much-discussed film appeared in Barre for the first time. It is a matter of remark, according to those who were instrumental in getting the film here for the second time, that most of those who swarm the box office to make their seat reservations saw the film spectacle last October.

Many profess a desire to see the show again on account of the music, as a large orchestra accompanies the film, but there is a suspicion, among those who like to link their own particular brand of psychology with every uncommon phenomenon manifested, that the hurried call to arms of the past fortnight has something to do with the 50c office stampede.
